DETAILED ACTION

Claims 1-16 and 19-32 are pending in the application.

Rejections made in the previous Office Action which do not appear below have been overcome.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 12 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Faraci et al. {WO 94/13643}. WO 94/13643 is in the same patent family as U.S. Pat. 5,712,303 which is listed on the 1449 Form.

Determination of the scope and content of the prior art (MPEP §2141.01)

Applicants claim pyrazole products. Faraci et al. teach pyrazole products that are structurally similar to the instant claimed pyrazole products. See in Faraci et al., for example, wherein A is $-C(=O)$, R_1 is amino, R_2 is alkyl, R_3 is phenyl substituted with a acetyl-alkyl group and R_4 is halophenyl (pages 1 and 2). Also see, for example, the products on page 36, line 10; page 40, line 15; page 43, line 19; and page 44, lines 12-14. Faraci et al. teach that the pyrazole products are useful in treating disorders such as inflammatory disorders and immune suppression (page 5, lines 1-12).

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the products in the prior art and the instantly claimed products is that of generic description.

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

The indiscriminate selection of “some” among “many” is *prima facie* obvious. The motivation to make the pyrazole products derives from the

expectation that structurally similar products would possess similar activity (e.g. an anti-inflammatory).

One skilled in the art would thus be motivated to prepare products embraced by Faraci et al. to arrive at the instant claimed products with the expectation of obtaining additional beneficial products which would be useful in treating inflammatory disorders. Therefore, the instant claimed products would have been suggested to one skilled in the art.

Response to Arguments

Applicants' arguments filed July 26, 2002 have been fully considered. Applicants argue that the substituents represented by the instant R^3 variable do not overlap with the substituents that can be substituted on the phenyl ring (R^3 variable) in Faraci et al.

In response, Faraci et al. do teach substituents which overlap with the substituents represented by the instant R^3 variable. See, for example, the instant (b) and (k) definitions in R^3 in claim 1 and the products on

page 36, line 10; page 40, line 15; page 43, line 19; and page 44, lines 12-14 of Faraci et al. Therefore, the rejection is maintained.

Allowable Subject Matter

Claims 8-11, 13-16 and 19-31 are objected to as being dependent upon a rejected base claim, but would be allowable over the art of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

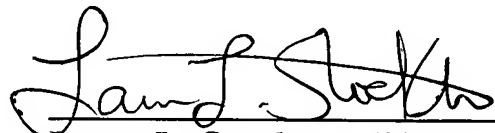

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened

statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
